SUMMARY

Senior Mobile Engineer with 4+ years of professional experience building AI, SaaS, SDK, and startup products. Currently leading mobile engineering for Twin.shop at Unstudio AI. Strong in Flutter architecture, Android/iOS releases, white-label SDKs, on-device AI, RAG-based apps, multimodal interfaces, and AI-assisted development using Cursor, Claude Code, and GitHub Copilot.

SKILLS

Mobile: Flutter, Dart, Android, iOS, Riverpod, Provider, BLoC, go_router, Material 3, Firebase, App Store, Play Store

AI / ML: On-device LLMs, RAG, local inference, embeddings, vector search, multimodal AI, face recognition

AI Tools: Cursor, Claude Code, GitHub Copilot, LLM-assisted debugging, refactoring, test generation

Backend / Web: Node.js, FastAPI, REST APIs, Next.js, React.js, TypeScript, JavaScript, Python, Go

Data / Cloud / DevOps: PostgreSQL, MongoDB, ObjectBox, AWS, GCP, Docker, GitHub Actions, Jenkins, Postman

PROFESSIONAL EXPERIENCE

Lead Engineer – Mobile

Jul 2025 – Present

Unstudio AI/ Twin.shop

Gurugram, India

- Lead mobile engineering for **Twin.shop**, an AI-powered virtual try-on and shopping platform.
- Own Flutter architecture, feature delivery, release planning, performance, and production-quality mobile standards.
- Build AI-backed shopping and virtual try-on flows in collaboration with design, backend, and AI teams.
- Work on production integration of generative AI experiences, including mobile UX, API contracts, latency handling, loading states, and fallback flows.
- Design reusable Flutter components for image-heavy shopping journeys, product discovery, try-on interactions, and personalized user flows.
- Drive modular code structure, maintainable state management, analytics readiness, debugging practices, and scalable release workflows.
- Use Cursor, Claude Code, and LLM assistants for rapid prototyping, debugging, refactoring, documentation, and test support while maintaining manual review and production-quality standards.

Software Engineer – Mobile

Dec 2023 – Jul 2025

RentOk

Gurugram, India

- Built Flutter-based SaaS products serving **30,000+ property owners** and **250,000+ tenants**.
- Led iOS development for the Manager App and migrated the Tenant App from legacy code to a modern Flutter architecture.
- Developed a **white-label Tenant App SDK** for partner-branded apps, contributing to **~80% enterprise revenue growth**.
- Built a dynamic branding library for runtime logo/icon switching with Android-specific app identity handling.
- Improved multi-tenant app delivery by supporting partner-specific branding, configuration-driven flows, and reusable mobile modules.
- Delivered AI attendance and cafeteria modules using face recognition, geolocation, and QR workflows, reducing manual effort by up to **~70%**.
- Designed an AI-assisted complaint-management module with categorization and priority routing, reducing resolution time by **~50%**.
- Collaborated with backend, product, and design teams to ship scalable mobile features across property, tenant, attendance, complaint, and partner workflows.

Founding Engineer

Jul 2021 – Jun 2022

RooftopApp

Remote

- Built the company's first Flutter mobile and web product from prototype to early production.
- Owned mobile architecture, reusable UI components, Firebase integration, and release-readiness for the initial product launch.
- Managed Play Store and Web releases, CI/CD using GitHub Actions and Codemagic, and GitHub repository workflows.
- Integrated Razorpay, Firebase Authentication, analytics, event tracking, modular app structure, SEO, and unit/widget tests.

PROJECTS

Manthan – On-device AI Assistant

Flutter, Dart, Local LLMs, RAG, ObjectBox

- Built a privacy-first AI assistant with local LLM inference, offline chat history, multimodal image input, voice input, and model management.
- Implemented pluggable inference using LiteRT/MediaPipe Gemma models and llama.cpp/GGUF through Dart FFI.
- Added on-device RAG with document chunking, embeddings, ObjectBox HNSW vector search, and grounded responses over local files.
- Designed an offline-first Flutter architecture focused on local data persistence, model switching, conversational UX, and device-friendly performance.

Custom Android ROMs & Device Trees

Android, Kernel, Open Source

- Maintained custom Android ROM and device-tree work for Xiaomi devices, focusing on optimized builds, compatibility, device bring-up, and system-level debugging.

EDUCATION

St Thomas' College of Engineering and Technology

Kolkata, India

B.Tech in Computer Science Engineering, GPA: **9.50**

Aug 2019 – Jul 2023
